

## Small Bathroom, Big Impact: A Stunning Transformation

Remember the feeling of walking into a space that's, well, uninspiring? That was the case in this bathroom. Its older design no longer resonated with the home's overall aesthetics. But more than that, it didn't feel inviting. Gloomy colors, outdated fixtures, and a lack of personal touch reduced the bathroom to a utilitarian space, not worth spending much time in. It was our job to reinvent the whole room to blend functionality, beauty, and peace. Read and find out how Elite Remodeling turned poorly designed and restrictive areas into gems of design and utility.

---

### Creating a sense of openness

Picture walking into a room filled with soft, pearly white light. Feels instantly soothing, right? But it wasn't just about the paint. Our choice of white marble tiles gave the room a unique look and kept it from feeling cramped. Funny how they kind of play tricks on your eyes, making the place seem bigger than it is. And let's not forget about the carefully placed mirrors and those clear glass shower doors - a small but striking touch that pulls everything together.

---

## Addressing storage issues

In more compact spaces, even a tad bit of clutter can become glaringly obvious. So, the real art was ensuring family essentials had their place, without overwhelming the room. However, our team rose to this challenge beautifully, demonstrating expertise by crafting storage solutions that are not only practical but also pleasing to the eye. We positioned a small cabinet right next to the sink, making the most of that often-overlooked space. Our design also included built-in shelves, providing ample storage without taking up too much space. And to cap it off, a solitary wall hook perfectly positioned for a hand towel, effortlessly elevating the room's charisma.

## Adding dimension through natural elements

Integrating nature-inspired elements is the secret sauce to turning even the quirkiest bathrooms into a peaceful retreat, and blending the indoor space with the tranquil ambiance of the outdoors. In those more compact or uniquely shaped bathrooms, a natural focal point can be a game-changer, drawing the eyes away from uneven ceilings or tight corners. That's precisely the reasoning behind our choice to introduce a stone backsplash above the vanity. This touch not only elevates the room's aesthetic but also infuses it with a raw, organic warmth.

## Meet one of our business partners - Chad Wilson

Chad has been in the industry for 8+ years. He has learned the business from his father and cousin over the years. Today he has migrated to the level of Crew Chief for Elite and regularly receives great reviews from our clients for his communication skills, his punctuality, his tireless devotion to quality and being available as needed.

## spotlight - Stephen Faulk

Stephen brings a wealth of design and construction knowledge to Elite. His remodeling career spans 20+ years and has centered mostly around residential construction. Stephen understands the challenges in design and construction that residential remodeling presents. Stephen earned his CAPS designation from the NAHB 2 years ago and is working on his NARI CRPM currently. More importantly, we must give Stephen the all time "attaboy" award as he is the only male in his household of 6!!!
